AMEERUL MUJAHIDIN

IT System Engineer | Infrastructure, Cloud & On-Premises Operations

Ajman, UAE • +971-543845984 • ameerulmujahidin96@gmail.com

PROFESSIONAL SUMMARY

IT System Engineer with 7+ years of UAE enterprise experience designing, deploying, and running complex hybrid infrastructures entirely from the ground up. Currently managing a 100+ node on-premises data centre environment at City University Ajman — 25+ physical servers, 75+ Windows and Linux VMs, sustaining 99.9% uptime for 2,000+ users daily. I have personally built and delivered four major open-source infrastructure platforms: Moodle LMS, JumpServer PAM, Snipe-IT ITAM, and Hesk Helpdesk — owning every phase from architecture through go-live. Hands-on across Microsoft 365, Azure (AZ-104), Entra ID, Intune, Active Directory, Hyper-V, Huawei switching (Agile Controller, eSight, iMaster NCE), Zabbix monitoring, and Veeam backup — including a live production disk failure recovery completed in under 1 hour with zero data loss. I automate everything I can: PowerShell and Python pipelines that cut manual workload by 60%. CCNA-certified, ITIL-aligned, and consistently the go-to technical lead for campus-wide infrastructure projects and vendor negotiations.

CORE COMPETENCIES

Cloud & Identity: Microsoft Azure (AZ-104), Microsoft 365, Entra ID, Conditional Access, MFA, RBAC, Zero Trust, Azure AD Connect, AWS, Google Workspace

Systems Administration: Windows Server 2016/2019/2022, Linux (Ubuntu, CentOS), Active Directory, DNS, DHCP, GPO, IIS, Hyper-V, VMware ESXi

Virtualisation & Compute: Hyper-V (full stack — feature enablement to live VM management), VMware ESXi, VM provisioning, snapshots, high availability concepts

Endpoint & Device Management: Microsoft Intune, MDM/MAM Policies, Device Compliance Baselines, Microsoft Defender, Kaspersky EDR, Endpoint Lifecycle Management

Networking: Cisco (CCNA), Huawei L2/L3 Switching, Agile Controller, eSight, iMaster NCE, FortiGate, VLAN, ACL, VPN, Cloudflare, PRTG

Monitoring & Observability: Zabbix, PRTG — full platform deployment, dashboards, SNMP polling, threshold alerting, capacity trending

Storage & Backup: SAN/NAS, LUN Provisioning, RAID, MPIO, Veeam Backup & Replication, Huawei OceanStor, QNAP, Hybrid Cloud DR, Validated Restore Testing

Open-Source Platforms Deployed: Moodle LMS (Azure-to-on-prem migration, v3.8 to v4.5 upgrade), JumpServer PAM, Snipe-IT ITAM, Hesk Helpdesk, Open Project, Guacamole (virtual app delivery), Koha

Database & Middleware: SQL, MySQL administration — user management, roles, migrations (2012 to 2016), performance tuning; dual-server app/DB architecture on Ubuntu

Automation & DevOps: PowerShell (Joiner-Mover-Leaver automation, reporting, compliance), Python, Bash, Git/GitHub, Docker, CI/CD pipelines

Procurement & Vendor Management: BOQ preparation, vendor evaluation, multi-supplier quotation management, IT procurement coordination, audit-aligned asset lifecycle

ITSM & Governance: ITIL, Incident/Change/Problem Management, SLA Compliance, Asset Lifecycle, Helpdesk Administration, L3 Escalation Support

PROFESSIONAL EXPERIENCE

IT System Engineer

Sep 2023 – Present

City University Ajman | Ajman, UAE

- Manage a 100+ node on-premises data centre — 25+ physical servers and 75+ Windows/Linux VMs — sustaining 99.9% availability across all academic and enterprise systems for 2,000+ daily users.

- Architected and migrated Moodle LMS from Azure to on-premises infrastructure — built dual-server architecture (Ubuntu 22.04 LTS app and DB nodes), performed full data migration, installed and optimised all plugins, and upgraded platform from v3.8 to v4.5 with zero data loss.
- Deployed JumpServer as the university's Privileged Access Management (PAM) solution — centralising SSH/RDP access control, session recording, and auditing across all critical infrastructure nodes.
- Implemented Snipe-IT as the institution's IT Asset Management system — replacing manual tracking with full lifecycle visibility across 500+ hardware assets covering procurement, assignment, audit, and retirement.
- Deployed Hesk Helpdesk as the campus-wide ticketing platform, enabling structured incident intake, SLA tracking, and reporting across all IT support functions.
- Deployed Apache Guacamole for virtual application delivery — enabling students to access campus lab software remotely via browser without physical presence.
- Configured and manage Huawei campus switching infrastructure (access, distribution, and core layers) via Agile Controller, eSight, and iMaster NCE — configuring switches from scratch, enforcing VLAN segmentation, QoS policies, and port security at scale.
- Manage Microsoft 365 and Entra ID for 2,000+ users — Conditional Access, MFA, RBAC, identity governance, and Azure AD Connect hybrid sync, aligned to Zero Trust principles.
- Built and maintain Zabbix monitoring platform covering 100+ nodes — dashboards, SNMP polling, threshold alerting, and capacity trend reporting that give the team early warning before issues escalate.
- Automate the full Joiner-Mover-Leaver lifecycle via PowerShell: user provisioning, licensing, mailbox configuration, access reviews, and secure deprovisioning — cutting provisioning time by 60%.
- Lead SAN/NAS operations: LUN provisioning, RAID tuning, and MPIO optimisation on Huawei OceanStor and QNAP arrays — delivering a 35% improvement in storage I/O throughput.
- Manage Veeam Backup & Replication with hybrid cloud redundancy and validated restore testing; led a live production server disk failure recovery — restoring full operations in under 1 hour with zero data loss, achieving near-zero RPO in a real critical incident.
- Administered MySQL databases across university systems — managing users, roles, performance tuning, and executing a server migration from MSSQL 2012 to 2016 with no service interruption.
- Manage Microsoft Intune for device enrolment, compliance policies, and endpoint security baselines, support Microsoft Defender investigations for identity and endpoint threats.
- Prepare BOQs, coordinate multi-vendor quotation processes, evaluate suppliers, and work directly with the procurement team to finalise hardware and software acquisitions for infrastructure projects.
- Serve as technical point of contact and delivery lead for campus-wide projects including Digital Classroom rollouts and specialist technology lab builds — managing vendors, timelines, and acceptance testing end-to-end.
- Provide L3 technical escalation support for complex incidents across systems, networking, and application layers — resolving within agreed SLAs for faculty, staff, and administrative users.

IT Support & Technical Engineer

Nov 2020 – Aug 2023

TwinMOS Technology Middle East FZE | Dubai, UAE

- Administered Microsoft 365, ERP systems, email routing, and cloud services for 50+ users across multi-site regional offices.
- Configured Wi-Fi networks, access points, managed switches, and NAS storage solutions across regional branches.
- Resolved 40-60 support tickets daily at 95%+ SLA compliance, covering OS, networking, hardware, and cloud platforms.
- Maintained asset register for 100+ devices with full end-to-end lifecycle tracking from procurement through disposal.
- Executed OS deployments, patch cycles, and endpoint performance optimisations to sustain business continuity across all sites.

Network & System Support Engineer

Jun 2018 – Aug 2019

Mundo Trading Pvt Ltd | Chennai, India

- Installed and configured Cisco routers, Dell servers, and enterprise networking equipment for client environments.
- Managed 20-30 daily support tickets via remote tools (TeamViewer, AnyDesk), maintaining high service continuity.
- Performed OS deployments, patch management, and network diagnostics across client infrastructure.

KEY PROJECTS DELIVERED

- Moodle LMS Migration & Upgrade — Migrated university e-learning platform from Azure to on-premises data centre, built dual Ubuntu server architecture, upgraded from v3.8 to v4.5, serving the entire campus faculty and student body.
- JumpServer PAM Deployment — Designed and implemented Privileged Access Management solution from scratch, centralising access control and audit trails for all critical university infrastructure.
- Snipe-IT ITAM Implementation — Replaced manual spreadsheet-based tracking with a full IT Asset Management platform, covering 500+ assets across the entire university lifecycle.
- Hesk Helpdesk Rollout — Deployed campus-wide ticketing system, standardising incident management and enabling SLA reporting across all IT functions.
- Apache Guacamole Virtual Lab — Deployed browser-based remote application delivery platform, enabling students to access campus lab environments from any location.
- Digital Classroom Infrastructure — Served as technical lead for multi-site classroom technology rollouts, coordinating vendors, AV integration, and network provisioning.

KEY ACHIEVEMENTS

- Recovered a critical production server from disk failure in under 1 hour with zero data loss using Veeam Backup & Replication — achieving near-zero RPO and keeping business disruption to an absolute minimum.
- Cut manual IT workload by 60% through PowerShell and Python automation across user provisioning, compliance reporting, and system health checks.
- Improved storage I/O throughput by 35% via MPIO optimisation and SAN/NAS tuning on Huawei OceanStor and QNAP systems.
- Reduced reporting cycle time by 70% by building automated Zabbix and Grafana dashboards and Python data-extraction pipelines.
- Boosted organisational compliance posture by 50% through VLAN segmentation, ACL enforcement, and FortiGate firewall hardening.
- Maintained 99.9% uptime across 100+ servers and VMs while supporting 2,000+ concurrent academic and enterprise users.
- Delivered six major infrastructure projects as sole technical lead — including Moodle LMS, JumpServer PAM, Snipe-IT ITAM, Hesk Helpdesk, Guacamole virtual labs, and Digital Classroom rollouts — all on time and within budget.

EDUCATION

Bachelor of Engineering – Computer Science 2014 – 2018

MSEC, Tamil Nadu, India

CERTIFICATIONS & TRAINING

- Microsoft Azure Administrator Associate (AZ-104) — Microsoft
- Cisco Certified Network Associate (CCNA) — Training
- AWS Cloud Practitioner — Udemy
- Fortinet Certified Fundamentals (FCF) — Fortinet
- Moodle Administrator Certification — Moodle Academy Training

LANGUAGES

English – Professional Working Proficiency | Tamil – Native
