# AMEERUL MUJAHIDIN

## IT System Engineer

Ajman, UAE | +971-543845984 | ameerulmujahidin96@email.com | LinkedIn | Portfolio

## PROFESSIONAL SUMMARY

Results-driven IT System Engineer with 7+ years of experience designing, administering, and optimizing complex hybrid infrastructures in the UAE. Proven track record managing 25+ physical servers and 75+ Windows/Linux VMs while maintaining 99.9% uptime for 2,000+ users. Deep expertise in Microsoft 365, Azure (AZ-104 certified), Active Directory, Intune, and Zero Trust security frameworks. Skilled in Python and PowerShell automation, reducing operational workload by up to 60%. Experienced in VLAN segmentation, SAN/NAS management, Veeam backup, and IT governance — aligned with UAE Vision 2031 digital transformation goals.

## CORE COMPETENCIES

**Cloud & Identity:** Microsoft Azure (AZ-104), Microsoft 365, Entra ID, Conditional Access, MFA, RBAC, Zero Trust, AWS, Google Workspace

**Systems Administration:** Windows Server, Linux, Active Directory, DNS, DHCP, GPO, IIS, Hyper-V, VMware

**Security & Compliance:** Microsoft Defender, Intune, FortiGate, Kaspersky EDR, Network Hardening, ACL, VPN, VLAN Segmentation

**Storage & Backup:** SAN/NAS, LUN Provisioning, RAID, MPIO, Veeam Backup & Replication, Hybrid Cloud DR, Huawei OceanStor, QNAP

**Automation & Tools:** PowerShell, Python, Bash, Docker, Git/GitHub, CI/CD, Grafana, Zabbix

**Networking:** Cisco, FortiGate, Huawei L2/L3 Switching, VLAN, ACL, VPN, PRTG, Cloudflare, Agile Controller

**ITSM & Governance:** ITIL, Incident Management, Change Management, SLA Compliance, Asset Lifecycle, Vendor Management, Helpdesk, Asset Management, Project Management

**Platforms & Apps:** Moodle (LMS), JumpServer, Koha, Zoom, Teams, Google Workspace

## PROFESSIONAL EXPERIENCE

### IT System Engineer | City University Ajman

*September 2023 – Present | Ajman, UAE*

- Administer hybrid infrastructure comprising 25+ physical servers and 75+ Windows/Linux VMs, maintaining 99.9% availability across academic and enterprise systems.
- Manage Microsoft 365 and Entra ID for 2,000+ users, implementing Conditional Access, MFA, RBAC, and identity governance aligned with Zero Trust principles.
- Automate Joiner–Mover–Leaver lifecycle via PowerShell, covering provisioning, licensing, mailbox configuration, access reviews, and secure deprovisioning.
- Administer Active Directory, DNS, DHCP, GPO, and hybrid identity synchronization, ensuring secure authentication and policy enforcement across the organization.
- Manage Microsoft Intune for device enrollment, compliance policies, and endpoint security baselines; support Microsoft Defender for identity and endpoint investigations.
- Lead SAN/NAS operations including LUN provisioning, RAID configuration, performance tuning, and MPIO optimization — improving storage I/O throughput by 35%.
- Maintain backup and disaster recovery using Veeam with hybrid cloud redundancy and validated restore testing to ensure business continuity.
- Implement VLAN segmentation, ACLs, and firewall hardening, improving organizational compliance posture by 50%.
- Develop Python and PowerShell automation scripts, reducing manual IT workload by 60% and reporting time by 70%.
- Lead infrastructure rollouts for Digital Classrooms and specialized technology labs; govern IT asset lifecycle, procurement, vendor evaluation, and audit-aligned tracking.
- Provide L3 technical leadership, managing escalations and SLA-driven incident management processes.

**IT Support & Technical Engineer** | **TwinMOS Technology Middle East FZE**

*November 2020 – August 2023 | Dubai, UAE*

- Administered Microsoft 365, ERP systems, email routing, and cloud services for 50+ users across regional offices.
- Configured Wi-Fi networks, access points, switches, and storage solutions for multi-site regional operations.
- Resolved 40–60 support tickets daily, maintaining 95%+ SLA compliance across OS, network, hardware, and cloud platforms.
- Maintained comprehensive asset management for 100+ devices, implementing end-to-end lifecycle tracking and documentation.
- Executed system patching, OS upgrades, endpoint deployments, and performance optimizations to sustain business stability.

**Network & System Support Engineer** | **Mundo Trading Pvt Ltd**

*June 2018 – August 2019 | Chennai, India*

- Installed and configured Cisco routers, Dell servers, and networking equipment for enterprise clients.
- Resolved 20–30 daily support tickets using remote tools (TeamViewer, AnyDesk) ensuring high service continuity.
- Conducted OS deployments, patch management, and network diagnostics to maintain business stability.

## EDUCATION

**Bachelor of Engineering – Computer Science**

*MSEC, Tamil Nadu, India | 2014 – 2018*

## CERTIFICATIONS & TRANINGS

- Microsoft Azure Administrator Associate (AZ-104) – Microsoft, 2026
- AWS Cloud Practitioner – Amazon Web Services
- CCNA – Cisco Certified Network Associate
- Fortinet Certified Fundamentals – Fortinet
- Apple Support Engineer – Apple
- Moodle Administrator Certification
- Generative AI Prompt Engineering

## KEY ACHIEVEMENTS

- Reduced IT manual workload by 60% through PowerShell and Python automation across provisioning, reporting, and compliance tasks.
- Improved storage I/O throughput by 35% through MPIO optimization and SAN/NAS tuning on Huawei OceanStor and QNAP systems.
- Enhanced organizational compliance posture by 50% via VLAN segmentation, ACL enforcement, and FortiGate firewall hardening.
- Maintained 99.9% system availability across 100+ servers and VMs while supporting 2,000+ academic and enterprise users.
- Reduced reporting time by 70% through development of automated dashboards and data extraction tools.
